

## Silton Surgery

# INFECTION CONTROL POLICY

## Introduction

This document sets out the surgery policy on infection control and should be used with reference to the principles outlined in the Infection Control (Biological Substances) Protocol and The NHS Infection Prevention and Control CQC Inspection Preparation Pack for General Practice.

## Policy Statement

This practice is committed to the control of infection within the building and in relation to the clinical procedures carried out within it. The practice will maintain the premises, equipment, drugs and procedures to the standards and will provide facilities and the financial resources to ensure that all reasonable steps are taken to reduce or remove all infection risk.

Wherever possible or practicable, the practice will seek to use washable or disposable materials for items such as soft furnishings and consumables, e.g. seating materials, wall coverings including paint, bedding, couch rolls, modesty sheets, bed curtains, floor coverings, towels etc, and ensure that these are laundered, cleaned or changed frequently to minimise risk of infection.

## Management of Infection Risk

The staff member responsible for Infection Control is Sr Jessica Twiston-Davies

Sr Jessica Twiston-Davies will be responsible for the maintenance of personal protective equipment and the provision of personal cleaning supplies within clinical areas

Sr Jessica Twiston-Davies will be responsible for the maintenance of the provision of personal cleaning supplies within non-clinical areas

Sr Jessica Twiston-Davies will be responsible for the maintenance of sterile equipment and supplies, and for ensuring that all items remain "in date"

### ***The following general precautions will apply:***

- A daily, weekly, monthly and 6 monthly cleaning specification will apply and will be followed by the cleaning staff.
- Infection Control training will take place for all staff on an annual basis and will include training on hand decontamination, hand washing procedures, sterilisation procedures, the use of

Personal Protective Equipment (PPE) and the safe used and disposal of sharps. See also:  
Handwashing Techniques

- Infection Control Training will take place for all new recruits.
- Hand washing posters will be displayed at each designated hand basin.
- The practice will ensure that all staff have access to sufficient and appropriate supplies of materials for hand decontamination, PPE and sharps containers.
- Audits, as detailed in the CQC Inspection Preparation Pack, will take place and the findings will be reported to the multi-disciplinary team meeting for (any) remedial action.
